What is Numerology?

Numerology is the study of numbers and how they relate to certain characteristics of a person or pet. Each number has its own qualities and traits, like the notes on a musical scale. And every name and birth date is like a song or melody having its distinctive sound.

The roots of numerology can be traced back some 10,000 years to Egypt and Babylonia. Pythagoras, who developed many of the basic theories that form the foundation of modern mathematics, is credited with formally organizing the field of numerology about 2600 years ago in ancient Greece. Pythagoras taught and believed that there are nine basic numbers and that all other numbers are simply repetitions of the numbers one through nine.

In numerology certain numbers are core numbers. Two of these numbers are The Personality Number, and The Life Path Number. We will use these particular core numbers as guideposts to helping us understand a person's or pet's personality, and tendencies of how a person or pet will respond to life's challenges. How these numbers are calculated is shown below. We will be using the name of Chester, who is one of my best animal friends.

The Basic Numerology Calculation for The Personality Number

This process converts the letters of a name into a single number.

The basic calculations are as follows:

1. The letters are first translated into numbers
2. Next the numbers are added together and
3. Finally the sum of the numbers is reduced to a single number.
4. The following chart shows which number is associated with which letter.

1	2	3	4	5	6	7	8	9
A	B	C	D	E	F	G	H	I
J	K	L	M	N	O	P	Q	R
S	T	U	V	W	X	Y	Z	

Example: CHESTER

1. Look at the chart above to determine which number corresponds to each letter of the name:

C=3, H=8, E=5, S=1, T=2, E=5, R=9

2. Add the numbers and reduce them to ONE number:

$$3 + 8 + 5 + 1 + 2 + 5 + 9 = 33.$$

3. The number 33 is reduced like this: $3 + 3 = 6$.

4. Therefore, SIX is the number to be analyzed.

The Basic Numerology Calculation for The Life Path Number

This process converts the Date of Birth into a single number. The basic calculations are as follows:

1. Reduce the month, day and year to single numbers
2. Next the numbers are added together and
3. Finally the sum of the numbers is reduced to a single number, if needed.
4. (January = 1, February = 2, March = 3, April = 4, May = 5, June = 6, July = 7, August = 8, September = 9, October = 10 or $1+0=1$, November = 11 or $1+1=2$, December = 12 or $1+2=3$).

Example: CHESTER was born on June 21, 2000 (6/21/200).

1. $6 + (2+1=\underline{3}) + (2+0+0+0=\underline{2})$
2. $6 + 3 + 2 = 11$
3. $1+1 = 2$
4. Therefore, the number TWO is the number to be analyzed.

How to analyze The Personality Number

The Personality Number is just what it says it is, a map to your overall personality, both the inner you that you only share with close friends and family and the outer you that you share with the general public. It reveals how you choose to express yourself to the world and is also a clue to what

type of work suits you best. Find your number and read the phrase that best describes that number, the planet that it is ruled by, the color and animal associated with it and the keywords that will help you on your journey of discovery through your life.

How to analyze The Life Path Number

The Life Path Number is that lesson or goal that you came here to learn or achieve. Unlike your name this is a number that cannot be changed. It is the energy and principle behind this number that will give purpose and meaning to your life. Take note of the key phrase and keywords because they will help to guide you through life.

What follows is the animal associated with each number for you to color. PLUS the key phrase, keywords, the planet, color and job indicators for each number. Enjoy!
